Exceptional Watchwinders
 Fine watches stay wound, while their owners unwind.

Avanti Series

Complete customization. New luxury. The Avanti Series offers 7 NEW styles to keep your collection fully wound. Showcased in Italian made Brazilian Rosewood veneer cases with genuine Carbon Fiber panels for décor and durability. All in all, a totally new family, not only for winding watches but for storing and displaying valuables such as cufflinks, pens, coins, jewelry, pocket watches and other personal items.

The larger units can also be configured to include Sempre watchwinders for manually wound watches, as well as digital clocks and biometric security safes. Each unit can be tailored to your needs and upgraded as your collection grows.

The heart of the Avanti series is the SELF PROGRAMMING winder module powered by 5-year Lithium batteries. The patented ROTORWIND® system "rocks" the watch in an oscillating mode once every 10 minutes. This gentle action replenishes the mainspring tension lost in the previous 10 minutes, assuring virtually constant mainspring torque and the highest watch accuracy. Ball bearing construction throughout, coupled with the use of Swiss designed ironless core precision servomotors, assures long life with no maintenance ever required.
